2018	Carlisle Music Festival – Second prize – Class: Family Music Making
2016	Finalist School Competition - 'Young Enterprise', GCSE economics revision guide
2016	Duke Of Edinburgh Silver Award

INTERESTS

From an early age I learnt how to play the Tenor Horn where I progressed through the grades and competed at local music competitions. This is where I gained the confidence to perform on stage in front of judges and spectators whilst under a lot of pressure. It also taught me how to work independently and critic my own performance in order to perfect a musical piece.

My passion for rock climbing has led me to join the university the mountaineering society where for the past two years I have held positions on the committee including being the gear and safety officer. This involved taking part in numerous first aid courses and looking after and keeping track of large amounts of expensive equipment.

I have been running at a competitive standard for the last 3 years. Through coaching myself I have learnt how to reach long term goals through consistency, patience and setting multiple short-term targets as well as dealing with setbacks such as injuries. As the current long-distance coach for the Athletics Society, I have responsible for organising and running track sessions and more recently, I have been running strength and conditioning sessions online.
