### **Professional Profile**

I am a hardworking and innovative student currently doing my final year BSc in Computer Information Systems for Business at Bangor University, looking for a graduate level job to pursue my drive for learning and further develop my current skills. I am a reliable team player with a personable nature and positive communication style who is determined to complete every task to the highest standard.

- Passion for continuous learning & professional development
- Focussed and attentive
- Approachable and friendly
- Sensible and practical
- Flexible and helpful

### **Education**

Bangor University – 2018 to present

- Studying BSc in Computer Information Systems for Business
- First Year result: 1:1 Second Year result: 2:1
- Programming Languages: Java, Python, C#

Hertswood Academy - 2016 to 2018

- A-Levels: Mathematics (B), Further Mathematics (D), Physics (E)

Hertswood Academy 2011- 2016

- GCSE's 1 A\*, 7As, 3Bs including Further Mathematics, Mathematics and English

### **Work Experience**

Sky PLC June 2015

- Mirrored the various teams including development, support and database management teams

Next PLC 2017-2018

- Part-time shop floor assistant
- Ensured sales target were achieved as well as providing friendly customer service in a professional environment

## **Key Skills**

### **Adaptable**

- I took part in The UK Space Design Competition hosted by Imperial College London to create a plan for the colonisation of Mercury in 14 hours with another school.
- My role was the Architectural Lead where I designed floor plans, facilities layouts and services for our prototype base, which demanded heavy amounts of communication between teams and the ability to quickly adapt due to the frequent changes in plans.

### **Resilient**

- In university I ran as Social Secretary and then President for DJ Society where I worked tirelessly to improve the name of the society. I did this by hosting multiple events, organising practice sessions with a more structured form of teaching and creating connections with other societies.

### **Strong communication and presentation skills**

- I organised a club event alongside my friend; in order to succeed I had to communicate with a variety of people including club managers, DJs, lighting assistants and sound assistants to ensure everything would run smoothly.
- I also managed the social media presence to increase the event out-reach

### **Team player**

- During a second-year group project there was a falling out between the group members, so I took the initiative to ensure all members continued work regardless of their feelings towards each other.
- In addition to this I had to communicate to group member who was failing to complete their task in a professional manner.

## **Interests and Achievements**

### **Cavendish House Captain**

- Helped running as well as providing support during inter house events i.e. sports day and music competitions. I had regular meetings with the Headteacher and Senior Learning Team, developing ideas to improve the house system and ways for students to get more from the system.

### **DJ Society – Social Secretary and President**

- During my time as Social Sec I have been involved with the society's marketing, social media management, venue and artist arrangement as well as door work.
- I worked heavily on improving the practice sessions by getting a sponsor venue to host sessions in, creating a more structured teaching approach and encouraging members to interact with each other giving more of a community feel.

### **Music**

- Piano - Grade 6 passed with Pass.
- I performed frequently at Academi Bangor and other venues around Bangor as a DJ.
